1 is a successor of v1 2. This means that the difference between the two is a brand new 4D and a new engine that can compete with the best of the current market. Like all new updates, the upgrade includes a number of new features and capabilities:

Laptops (1.x)The Laptop series is a next-generation game platform that allows you to play games using a portable PC. Key features include 4-digit display, LCD panel with 1.5-inch diagonal screen. The design of the C51, C52 and C55 is inspired by the flying sports car. All models include a remote control that allows you to watch the game in the car seat. The C50 includes a directional pad, while the C51, C52 and C55 include a three-axis joystick. Turbo DieselThe Turbo Diesel series is a next-generation game platform designed to provide the ultimate power driving experience. It is equipped with a 4-digit display, LCD panel with 1.5-inch diagonal screen, and includes a remote control that allows you to watch the game in the car seat. With a 2.8-liter turbo diesel engine, the C61 and C66 can reach speeds of up to 240 km/h, with an acceleration of up to 5.3 seconds. In addition to all this, the C61 and C66 come with the exclusive upgrade function—Turbo Diesel Power. 2.xPower seriesThe Power series is a next-generation game platform that allows you to play games using a portable PC. The design is inspired by the big jet aircraft with aerodynamic and aerodynamic lines. With 4-digit display, LCD panel with 1.5-inch diagonal screen, and a
